

## AMENDMENT OF SOLICITATION/MODIFICATION OF CONTRACT

1. CONTRACT ID CODE  
PAGE 1 OF 16 PAGES

2. AMENDMENT/MODIFICATION NO. 0002	3. EFFECTIVE DATE 11 MAR 02	4. REQUISITION/PURCHASE REQ. NO.	5. PROJECT NO. (If applicable)
6. ISSUED BY CONTRACTING OFFICER NAVAL RESEARCH LABORATORY ATTN: CODE 3230.SK WASHINGTON, DC 20375-5326	CODE N00173	7. ADMINISTERED BY (If other than Item 6)	CODE

8. NAME AND ADDRESS OF CONTRACTOR (No., street, county, State and ZIP Code)  TO ALL OFFERORS	(X) X	9A. AMENDMENT OF SOLICITATION NO. N00173-02-R-SK01 9B. DATED (SEE ITEM 11) 4 FEB 02 10A. MODIFICATION OF CONTRACT/ORDER NO. 10B. DATED (SEE ITEM 11)
CODE	FACILITY CODE	

## 11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☒ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offers ☐ is extended, ☒ is not extended.  
Offers must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended, by one of the following methods:  
(a) By completing items 8 and 15, and returning 1 copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment your desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

## 12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM ONLY APPLIES TO MODIFICATION OF CONTRACTS/ORDERS.  
IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

CHECK ONE	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.
	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(b).
	C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:
	D. OTHER (Specify type of modification and authority)

E. IMPORTANT: Contractor ☐ is not, ☐ is required to sign this document and return \_\_\_\_\_ copies to the issuing office.

## 14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)

SEE PAGE 2

Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.

15A. NAME AND TITLE OF SIGNER (Type or print)	16A. NAME AND TITLE OF CONTRACTING OFFICER (Type or print)		
15B. CONTRACTOR/OFFEROR  (Signature of person authorized to sign)	15C. DATE SIGNED	16B. UNITED STATES OF AMERICA  (Signature of Contracting Officer)	16C. DATE SIGNED

The purpose of this Amendment is to change the RFP, and publish questions and their answers.

1. No further questions will be addressed prior to the closing date.

2. Part I, Section B, CLIN 0001 is changed as follows:

**B-1 SUPPLIES OR SERVICES AND PRICES/COSTS**

ITEM NUMBER	SUPPLIES OR SERVICES	QTY	UNIT	UNIT PRICE	AMOUNT
<b>0001</b>	The contractor shall provide labor for all Service Calls (Routine & Emergency), Preventive Maintenance and Inspection, Re-lamping, Routine Operational Inspections and Special Testing for The equipment designated herein In accordance with Section C.				
<b>0001AA</b>	<b>In accordance with Section C</b> but not including work indicated or specified to be provided under items 0001B through 0001D . <b>FIXED PRICE CLIN</b>	12	MO		
<b>0001AB</b>	<b>(OPTION) In accordance with</b> Section C for all equipment and items in Bldgs 210, 210A, 210B, 210C, and 210D of the equipment inventory. <b>FIXED PRICE CLIN</b>	12	MO		
<b>0001AC</b>	<b>(OPTION) In accordance with</b> Section C for all equipment and items in Bldg 68 of the equipment inventory. <b>FIXED PRICE CLIN</b>	12	MO		
<b>0001AD</b>	<b>(OPTION) In accordance with</b> Section C for all equipment and items in Bldg 69 of the equipment inventory. <b>FIXED PRICE CLIN</b>	12	MO		
<b>TOTAL ITEMS 0001A through 0001D</b>				<b>\$</b>	

3. Section H, Paragraph H-4 is changed to read as follows:

#### **H-4 OPTION TO EXTEND THE TERM OF THE CONTRACT**

This contract shall be renewable at the unilateral option of the Government by the Contracting Officer giving written notice of renewal to the Contractor within the existing term of the contract. The Government may exercise its option to renew the contract a total of four (4) times and each such renewal shall extend the term of the contract by twelve (12) months. The Contractor agrees that performance under each such renewal shall be accomplished in accordance with all of the terms and conditions of this contract and at the estimated cost and fixed fee set forth below:

##### **First Option Year**

0001AA	\$
0001AB (OPTION)	\$
0001AC (OPTION)	\$
0001AD (OPTION)	\$

##### **Second Option Year**

0001AA	\$
0001AB (OPTION)	\$
0001AC (OPTION)	\$
0001AD (OPTION)	\$

##### **Third Option Year**

0001AA	\$
0001AB (OPTION)	\$
0001AC (OPTION)	\$
0001AD (OPTION)	\$

##### **Fourth Option Year**

0001AA	\$
0001AB (OPTION)	\$
0001AC (OPTION)	\$
0001AD (OPTION)	\$

4. Statement of Work Paragraph 3.4 is changed to delete the last sentence.

5. Statement of Work Paragraph 4.1 last sentence is changed to read: "Materials (ie tubes, bulbs, and ballasts, etc.) for this effort will be funded by CLIN 0002."

6. Attachment 5, page 9 is changed to add a PMI table for VAV and Constant Volume Boxes. See the revised page 9, attached.

7. Attached is a more current equipment inventory than was provided on the day of the site visit. As a result, please delete pages 1 through 154 of the original inventory distributed (the date of the site visit), and replace with new pages 1 through 121. Revised contract inventory will include new pages 1 through 121, plus pages 155 through 171 of the original inventory (ie, a total of 138 pages in the revised inventory). Note that building 43A has been added to the revised inventory. Also note that building 208 still lists numerous 'Coolers and Heaters', but as indicated in response to question No. 55 (below), this item description should be changed to VAV box re-heat coils. Also note that the revised inventory does not list all mechanical rooms. (NOTE: A hard copy of this revised inventory is available for pick-up by appointment.)

8. This amendment may contain changes which shall be considered to be an addendum to the SOW.

9. Answers to questions received are shown below.

Q1. Although referenced, Attachment #4 pertaining to Section H-7 isn't provided in the RFP.

A1. The NRL Equipment inventory which is listed as attachment #4 in section J (not H) was distributed on the site visit and is available for pick up upon request.

Q2. The history shown for service calls is 12,500 hours per year. Does this number include the service calls that pertain to interior and exterior lighting calls? Are there any major repairs included in these hours?

A2. No. And No.

Q3. Since the successful contractor will be managing Government materials, shouldn't the applicable sections of the FAR Part 45 be referred to by reference?

A3. There will be no government furnished material provided under this contract.

Q4. SOW, Section 3.1: Will the contractor be permitted to dispose of service call-generated and PM service-generated trash in the Government dumpsters? If not, will the contractor be permitted to bring a trash dumpster on site?

A4. No. Contractor to provide his/her own dumpsters.

Q5. SOW, Section 3.1: Please define what the term "engineering standards" refers to. There are numerous Government, trade and commercial standards.

A5. "Engineering Standards" refers to those prescribed procedures as required by UBC, BOCA, NEC, NFPA, ASHRAE, Industrial Ventilation, National Plumbing, and other local applicable codes.

Q6. SOW, Section 3.4: Please clarify the term "main disconnect switch." Depending on the type of equipment served, this term could cover everything from a unit-mounted switch to a motor control center or main building electrical distribution panel. Without clarification, it is unknown if the services required will fall within the scope of Steamfitter, HVAC Mechanic, or Journeymen Electrician. This presents cost impact to the bidders.

A6. The first disconnect on the exterior of the piece of equipment.

Q7. SOW, Section 3.4: Please provide a more detailed description of "stand-alone utility." The term "local" is placed in the sentence before this term, which implies PEPCO; does this mean NRL provided utilities?

A7. Delete the last sentence of paragraph 3.4

Q8. SOW, Section 3.6: Due to the varied nature, manufacturer, and age of the equipment on site, the requirement for the contractor to obtain O&M manuals for every piece may not be possible. Please advise as to the flexibility of this requirement.

A8. The contractor must comply with this requirement for new equipment. For existing equipment, the Contractor is expected to expend a reasonable effort to ensure the O & M Manual Library is complete.

Q9. SOW, Section 3.7: This section requires the contractor to provide to the COR a disk containing the CMMS data updates on a monthly basis. However, unless the COR has the same CMMS as the contractor, these disks are of no use. Was the intent of this section to be that the contractor will provide an additional "seat" on their CMMS for the COR to use, or load the program on their PC?

A9. The database must be kept in either Microsoft Word, Microsoft Excel, or Visual Dbase.

Q10. SOW, Section 3.10: Will the Government provide the storage vessels for the captured ozone depleting substances?

A10. No.

Q11. SOW, Section 3.11: Please provide a list detailing all the equipment rooms and their locations that the contractor is required to maintain. Without this information, bidders cannot get an adequate idea of the level of effort required or the costs that could be incurred. Please advise why the requirement is for "mechanical apprentices" to perform the cleaning of the mechanical rooms. Can the contractor use helpers or janitorial staff to perform this task?

A11. Mechanical equipment room locations, sizes, number, access, or control is not

important to the pricing of this effort. The requirement of bidders is “...Every other Friday, the contractor will be required to bring two mechanical apprentices to the NRL for the sole purpose of cleaning mechanical rooms of excess debris, and straightening out the appearance and cleanliness of the mechanical rooms...” The contractor cannot use janitorial staff. The requirement is for two mechanical apprentices every other Friday.

Q12. SOW, Section 3.11: If the neatness of the mechanical rooms will be the contractor's responsibility, will these rooms be locked and access-controlled by the contractor? Without this ability, the contractor cannot maintain control over this environment.

A12. As long as the two mechanical apprentices diligently work at cleaning mechanical rooms every other Friday, the Contractor's responsibility will be considered to be met. See response to question No. 11, above.

Q13. SOW 4.1: Will the re-lamping staff be required to perform any services outside of the monthly re-lamping schedule? (e.g., service calls)

A13. No.

Q14. Is the contractor required to provide ladders, a manlift, or a bucket truck to access elevated outside lighting?

A14. Yes, to a height no higher than 50 feet.

Q15. This section states that the re-lamping staff's sole purpose is to perform re-lamping services. However, the last sentence in this section states that materials such as ballasts and fixtures will be provided under CLIN 0002. This seems to conflict. Please clarify, will these personnel be required to perform repairs and fixture replacements?

A15. No. Re-lamping personnel will only change tubes, bulbs, and ballasts.

Q16. SOW, Section 10.0: If a service call cannot be completed within the 16 hours allotted, does this service call then become a reimbursable repair? If yes, are all hours reimbursable or only those in excess of the first 16 hours?

A16. Yes. Only those hours in excess of 16 will be reimbursable. For instance, if it takes the contractor 17 hours on a service call to diagnose and fix a problem, the contractor would only be reimbursed for 1 hour. Additionally, the contractor would be required to follow the proper procedures under section 14 of the Statement of Work, in order to be reimbursed for Major Repairs.

Q17. SOW, Section 10.1: Does the clock stop on the time permitted to complete a service call if access to the space is restricted by the Government or tenant?

A17. Yes. If inaccessible, the contractor is required to give proper notification to the COR, and the service call is closed out accordingly.

Q18. SOW, Section 13.0: Is eddy current testing only required on chiller condenser and evaporator tube bundles?

A18. Yes.

Q19. SOW, Section 13.0: Is the contractor required to provide closed-system water treatment?

A19. No.

Q20. SOW, Section 14.0: Since it's not required to be submitted on Section B, is the mark-up for materials and subcontracted trades not listed on the burdened rate schedule to be negotiated after contract award?

A20. Per L-11, "The Contractor should support the materials handling costs if proposed." and all information needed "to justify each fully burdened hourly rate" should be provided with the proposal.

Q21. Attachment #2: The current CBAs have not been included in the RFP.

A21. CBA's applicable to the current contract were made a part of the RFP. Even though they may now be expired, the current contract is based upon the CBA's that were provided in the RFP.

Q22. Attachment #5: On the AHU PM checklist, item 21 calls for the inspection of VAV boxes and branch ductwork. Stated as such, the semi-annual PM task could require entire building ductwork and terminal distribution systems inspected. This is a far-reaching PM task. Are we correct that this is the intent?

A22. Remove "...supply, return air, branch duct..." from the sentence for item no. 21 of the AHU PM Checklist.

Q23. Attachment #5: On the AHU PM checklist, task #17 calls for the semi-annual cleaning and flushing of the cooling/heating coils. If proper water treatment levels are being maintained, this task isn't required. Please advise if this service is desired.

A23. The PM is stated correctly.

Q24. Attachment #5: Please clarify the requirement on the chiller systems checklist for item 18. Is this all surfaces on the chiller? Is the intent that all chiller exterior surfaces are repainted semi-annually?

A24. Paint as necessary (ie, all rust spots). The intent is not to repaint entire chiller exterior surfaces semi-annually – only rust spots.

Q25. Attachment #5 Centrifugal Chillers: Most manufacturers no longer require or recommend annual oil changes. Please confirm that this is the desired requirement.

A25. The PM is stated correctly.

Q26. Attachment #5: Hot Water Boilers: Is the contractor responsible for annual pressure vessel inspections and certifications?

A26. Remove all hot water boilers from inventory and PMI Frequencies checklist.

Q27. General: Will the contractor be permitted to badge all staff for after hours access onto the Base?

A27. After hours badging is based upon the clearances of the company and the individual(s) who are requesting the badges.

Q28. General: Do any AHUs or CPUs require high-efficiency air filtration media?

A28. Up to 40% require HEPA filters.

Q29. General: What is the total square footage of the building covered under this contract?

A29. The square footage of buildings is not necessary for proposal preparation.

Q30. General: Is the contractor responsible for any asbestos repair, removal, or disposal?

A30. No.

Q31. General: Can non-U.S. citizens be assigned to work on this site?

A31. According to the security office, all persons to be granted access to the laboratory must be U.S. Citizens or have a valid Green Card.

Q32. General: Is there any risk to contractor staff of occupational exposure to radiation or other laboratory chemicals and gasses?

A32. Yes. Per Section C-2, Requirements for On-Site Contractors, paragraph 9 (available at: <http://heron.nrl.navy.mil/contracts/6onsite.htm> ).

Q33. General: Is the office space currently used by the incumbent contractor to remain for the new contract?

A33. NRL will provide space to the successful offer as described in the contract. The space provided may or may not be the current space.

Q34. General: Of the 12,500 hours of service calls, how many are routine and how many are emergency? How many calls are responded to monthly after normal working hours?

A34. Up to 40% are emergency service calls. Up to 10% are required after normal working hours.

Q35. General: Is the contractor responsible for disposal of hazardous materials that result from PM or service call tasks?

A35. Yes.

Q36. General: Are all confined spaces labeled?

A36. No.

Q37. General: Will mechanical room keys be issued to the contractor?

A37. Yes.

Q38. General: Is the contractor required to replace damaged or stained ceiling tiles?

A38. Only those ceiling tiles that are damaged by the source of a service call or those damaged by the contractor while fixing the service call.

Q39. General: Where light fixtures are blocked by furniture or partitions, who is responsible for moving these?

A39. NRL.

Q40. General: Is the contractor responsible for season valve over, start-up and shutdown of equipment?

A40. Yes.

Q41. General: What is the current condition of the closed-loop heating and chilled water systems in the buildings? Is the contractor responsible for repairs due to pinhole leaks and corrosion?

A41. In good condition. Yes.

Q42. General: How soon after PM tasks are performed will the Government representative inspect the equipment? This has impact, as a unit could have been PM'ed properly, but if not inspected in a timely manner, the contractor could be subject to liquidated damages.

A42. It will be checked as determined by the COR. However, most inspections will occur within 10 days of the projected PMI scheduled date. If a dispute arises because the contractor claims an

item was fixed prior to a COR inspection, such disputes will be resolved in accordance with the contract.

Q43. General: Please advise how the individual PM task liquidated damages amounts were arrived at. It appears that \$20 and \$50 amounts are assigned to most of these, however the individual tasks vary greatly.

A43. They are based upon the Government's estimate of Services not performed.

Q44. Due to the 9/11 terrorist incident in particular, as well as the usual volume of requests, granting of Personnel Secret level clearance has been taking up to one year or more. Can any access at all be granted to those acquiring an Interim Secret clearance, which takes roughly a month to obtain?

A44. It is possible on a case by case basis.

Q45. It is apparent from the RFP that the intent of NRL is to connect all of the buildings to the existing Siemens Apogee system. What is the tentative schedule for the connection of the other buildings to the Apogee system?

A45. No response necessary for bidding purposes.

Q46. Is a service agreement required for the Apogee system? If so, what are the requirements of the Navy?

A46. No.

Q47. General: Please explain how the issue of recovered materials will be handled. Example, a cooling coil is replaced that is of copper construction. The coil is government property, and the copper has salvage value. Is the coil to be turned over to the Government then for recovery and disposal?

A47. In this example the copper coil would be treated as trash and become the property of the contractor to be disposed of, in accordance with the contract. Any ODSs, though remain the property of NRL.

Q48. General: Please provide the expected award and contract service start dates.

A48. The exact dates are not known at this time, however it is anticipated that the new contract will be awarded and start in the spring of 2002. Contract award and contract start may be different.

Q49. General: Since Section B only lists a single area for the loaded burdened labor rates to be provided, is it to be understood that this single rate must cover all service provide weather its on regular, overtime or holiday hours?

A49. Yes. Whatever rate you provide should be supported, per RFP section L-11.

Q50. General: .... we are aware of the FAR Part 45 requirements for the reimbursed material handling procedures. However, the requirements for the management of the warehouse, annual audit by the Defense Logistics Agency DCMCB and DoD 4161.2-M Manual for Performance of Contract Property Administration need to be made very clear ....

A50. There will be no government furnished material provided under this contract.

Q51. General: Since the incumbent contractors staff are already on site, been through the security clearance process and are unionized with CBA governed benefits, should FAR 52.222-50 Nondisplacement of Qualified Workers be included in Section I?

A51. In the current FAR, this clause is "RESERVED".

Q52. General: Will reimbursable services ordered below the \$2,500 threshold be paid for by Government credit card?

A52. No.

Q53. Due to the state of the mechanical rooms observed during the site tour, we question how the successful contractor can be held responsible to clean these up. Since it appears that most, at least those visited are being used for storage of records, tools, equipment, furniture and assorted other debris, who will be responsible to decide what is trash and to be removed?

A53. If there is a question about what items should be removed as trash, the COR is responsible for answering that question.

Q54. It was observed in the mechanical rooms visited that there are large inventories of parts and supplies. Do these belong to the Government? If so, should the successful contractor plan on using this for repairs before ordering parts? If the parts are Government equipment and to be used does the Government understand and will make clear to all the bidders the FAR Part 45 sections applicable to transfer of Government property to the contractor and its handling? If the parts are not to be used, what is to be done with them when the mechanical rooms are cleaned?

A54. Yes. No. There will be no government furnished material provided under this contract. The COR is responsible for determining where items should be stored.

Q55. Please clarify in the building 208-equipment inventory what "heaters and coolers" refer to.

A55. All of the item descriptions "Heaters and Coolers" related to Bldg 208 need to be changed to item description "VAV box reheat coils". Also, please see attached new Frequency Checklist for VAV and Constant Volume Boxes.

Q56. Since they require different types of maintenance (man-hours) please clarify in the inventory which VAV boxes are fan-powered.

A56. Offerors should assume that up to 15% of the VAV Boxes on the inventory are fan powered.

Q57. Although observed on the tour, no radiators are referenced in the equipment inventory. Should we take it that no services would be required to this equipment? If PM services are required, please advise to the number of radiator's.

A57. See answer to question No. 39, above.

Q58. In order to calculate an accurate cost and risk factor, please provide a complete list of all energy management systems that the contractor is responsible to maintain. This information should include the system manufacturer, software revolution and number of connected points to be maintained.

A58. Bldg. 3 Siemens Apogee System Up to 900 points.  
Bldg.33 Siemens Apogee System Up to 200 points  
Bldg.42 Siemens Apogee System Up to 900 points  
Bldg.54 Barber Colman System Up to 100 points  
Bldg.60 Siemens Apogee System Up to 900 points  
Bldg.71 Trane Tracer System Up to 100 points  
Bldg.75 Barber Colman System Up to 200 points  
Bldg.207 Andover System Up to 200 points  
Bldg.209 Siemens Apogee System Up to 500 points  
Bldg.215 Johnson Metasys System Up to 1500 points Rel. 10.01  
Bldg.256 Andover System Up to 200 points  
Bldg.A13 Siemens Apogee System Up to 100 points

Q59. Since the chiller PM requirements (per GSA Guides) vary by tonnage, please provide the tonnage for each chiller. This information is necessary to determine the man-hour requirements.

A59. We do not follow GSA Guides in this area. Contract PMI Frequencies do not differentiate between tonnages.

Q60. Please provide the procedure for outsourcing reimbursable repairs found by the contractor during service calls or PM's. Will the on site contractor receive the first opportunity provide a proposal to perform this work, or will all work be bid out? Do any in-house Government shops personal perform this work?

A60. No extra work is guaranteed to the successful offerer. If the successful offerer is more cost effective than other sources, he/she will be used. If other sources are more cost effective and timely, they will be used over the successful offerer. NRL will always reserve its rights to get the work done in the most cost effective and timely manner.

Q61. Is the inventory list provided inclusive of all of the equipment that will be the responsibility of the O&M contractor?

A61. Yes. And in accordance with paragraph 3 of the Statement of Work.

Q62. When new equipment is installed through a contract other than the O&M contractor will the O&M contractor be notified for the purpose of warranty information and will the contractor performing the installation of equipment be responsible for all warranty repairs?

A62. Yes. And Yes.

Q63. Who will be responsible for low-pressure steam regulators?

A63. The successful offeror.

Q64. Can the government provide a list of all current contractors performing maintenance to equipment or controls?

A64. This is not necessary to proposal preparation.

Q65. Paragraph 2.0: What percentage of the equipment is currently tagged or bar-coded?

A65. Assume none. Anything that is already tagged or bar-coded should be assumed to be re-tagged and bar coded.

Q66. Paragraph 3.0: Are motor control centers included in the scope of work?

A66. No.

Q67. Paragraph 3.7: The Contractor shall provide a computer program: is this a software requirement only? And if hardware is required will you provide the minimum licensing requirements?

A67. The contractor will only provide the disks with updates (ie, the software). The government already has hardware to run the software. Any hardware (and associated licensing requirements) that is required by the contractor is the contractor responsibility.

Q68. Paragraph 3.7: Is there currently a maintenance software package that is being utilized to track facility maintenance and repair issues?

A68. No.

Q69. Paragraph 3.11: Cleaning of mechanical rooms: Is painting and labeling of system piping to be included in the cleaning requirements?

A69. No.

Q70. Paragraph 10.2 defines an emergency call as "adverse impact requires immediate response", is this adverse impact further refined as an emergency that would cause imminent equipment failure or threatens safety, health or environmental Issues as defined in section 11.2?

A70. No. Section 10 is with regards to service calls. Section 11 refers to deficiency lists noted during PMI.

Q71. Liquidated Damages: How do holidays figure into the LD formula?

A71. They count.

Q72. Attachment 2: Attachment two provides two CBA's on the project, percentage wise, can you provide a breakdown of the personnel affiliated with each bargaining unit?

A72. It is the Offerors' responsibility to estimate/determine what labor mix is appropriate/needed for this requirement.

Q73. Are there any secure areas on base that require special clearances by service personnel?

A73. No special clearances are required beyond those minimum security requirements as described in the contract for all contractor personnel.

Q74. In the event that isolation valves do not hold is "freezing " a line for repairs permissible?

A74. Yes. If it is done properly.

Q75. Does this contract cover baseboard heaters and steam radiators, and if so are the quantities indicated in the technical exhibits?

A75. Only general cleaning and dusting is required. These items are not listed in the inventory.

Q76. Because NRL by definition has numerous labs throughout the facility can you provide the number of buildings/labs that operate on 100% outside air?

A76. No response is necessary for bidding purposes.

Q77. Is the requirement to move lab equipment in order to facilitate a repair the responsibility of the contractor?

A77. No.

Q78. Are mechanical rooms accessible during normal/other than normal working hours and what provisions are in place pertaining to securing the mechanical rooms?

A78. Mechanical rooms are accessible at all times. No provisions necessary to secure.

Q79. There was no mention of back flow preventers in the RFP, is there a requirement to maintain the back flow preventers and if so how many and what size are the units?

A79. There is no requirement for Back Flow Preventers.

Q80. If the contractor responds to a service call that is not in the scope of work, will the cost of the work be reimbursable?

A80. No, it is reasonable to expect a certain error rate in service call forwarding.

Q81. Will parking be provided for all the contractor staff and service vehicles?

A81. Yes. In accordance with the contract terms.

Q82. Does the Government have a desired type or manufacturer for the bar-coding requirement?

A82. No.

Q83. Depending on where isolation valves is located, is the Contractor responsible for any underground piping found outside of the perimeters of the buildings? If yes, what is, the condition of this piping and the Isolation valves?

A83. See paragraph 3.4 of the Statement of Work.

Q84. Can the contractor schedule PM work outside of regular hours?

A84. See C-2 "Requirements For On-Site Contractors" under Hours of Operation. However, on a case by case basis, the COR may agree.

Q85. Will the contractor be permitted any phase-in period? If so, will the contractor be reimbursed for any phase-in costs?

A85. There will be no phase in.

Q86. Please advise if pre-existing deficiencies are not part of the basic services firm fixed fee. Will the contractor be permitted to perform an intake inspection detailing all pre-existing conditions and submit it for review?

A86. Pre-existing conditions of all equipment on the inventory are included.

Q87. Is the inventory to be provided at the site tour the one that the current contractor under contract to maintain now?

A87. This information is not necessary for proposal preparation.

Q88. Is there currently a computerized preventive maintenance system operating? Is it Government property? Is the current equipment inventory resident in it?

A88. No.

Q89. Please provide more detail on the handing of the purchase of materials. Is it to be understood that the contractor provides the materials and is then reimbursed 100% plus a negotiated overhead and fee? If the materials are purchased to be used at a later time or become shelf stock is space provided to the Contractor to store these? If so, shouldn't the applicable sections of FAR Part 45 be included In Section I? If a storage area is provided, will the only access to it be under the full control of the contractor?

A89. Yes, the contractor is reimbursed for purchased materials in accordance with the contract terms and to include an allowable overhead fee. Contractor storage space will be provided and will be controlled by only the contractor.

Q90. Due to the liquidated damages listed on the PM guides, shouldn't FAR 52.211-12 be included in Section I?

A90. No, FAR 52.211-12 is for Construction contracts. However, FAR 52.211-11 is included in Section F.

Q91. How many telephone lines will the Government furnish to the contractor office?

A91. Two.

**10.** All other terms and conditions remain unchanged.
